Franz Nikko C. Dacara

Full-Stack Developer | DevOps Engineer
Davao City, Philippines | +63264249587 | franzdacara25@gmail.com
Portfolio: https://nikkodacara.tech/

Summary

Web and Software Developer with expertise in full-stack development, specializing in designing innovative web solutions and scalable software applications. Proven ability to collaborate effectively, deliver high-quality code, and stay updated on industry trends.

Work Experience

Full-Stack Developer, EBOS Cloud Accountants

July 2025 – Current

- Designed and developed an **OCR-based AI Web API**, integrating local AI models to automate document processing and data extraction.
- Integrated new APIs into the company's existing accounting system to enhance functionality and system interoperability.
- Maintained and updated the core accounting platform to ensure **performance, stability, and compatibility** with evolving business requirements.
- Led and managed **CI/CD pipelines**, enabling automated builds, testing, and deployments to improve development efficiency and release reliability.

Web Developer and Mobile Developer, Segworks Technologies

August 2023 – July 2025

- Provided technical support and system maintenance for **10 Hospital Information Systems (HIS)**, ensuring high availability and operational reliability.
- Designed and implemented **customized system enhancements** to meet hospital-specific workflows and regulatory requirements.
- Developed and maintained **web and backend solutions** using **PHP, SQL, JavaScript, AJAX**, and reporting tools such as **JRXML, XML, and FPDF**.
- Built a **hospital queuing system** to streamline patient flow and reduce waiting times across departments.
- Integrated **PhilHealth V2** to **automate claims transmittal**, improving billing accuracy and reducing manual processing for healthcare providers.
- Developed **mobile applications for doctors and nurses** using **Dart**, enabling real-time access to patient data and clinical workflows.

Freelancer as Website Designer/Developer

November 2022 – January 2024

- Designed and developed responsive websites using **PHP, JavaScript, and jQuery**, tailored to client business requirements.
- Collaborated directly with clients to plan, build, and optimize websites, including **WordPress-based solutions** for content management and scalability.
- Applied **SEO best practices** during website development to improve search visibility and performance.
- Managed multiple projects simultaneously, meeting deadlines while maintaining quality and adherence to client specifications.

(Intern) Front End Developer, SPLACE BPO Company
February 2023 – March 2023

- Converted application concepts into **user-friendly, responsive web interfaces** for both mobile and desktop platforms.
- Developed front-end components using **HTML, CSS, and JavaScript**, enhancing user interaction and design flexibility.
- Contributed to the development of an **internal data gathering and lead generation system**, enabling structured data capture, storage, and reuse for BPO operational processes.

Video Editor/ Photo Editor, Jose Maria College Foundation Inc.
August 2022 - May 2022

- Edited videos for **school activities and events**.
- Organized and managed photo and video files used for school documentation.
- Selected clips, added basic effects, and incorporated stock images when needed.
- Edited photos using **Adobe tools** and captured images for school activities.
